

Setup Synchronization Folder

General Backup Exclude or include Filter Copy Options Encryption Delete

Backup

☒ **Enable backup archiving system.** Use this option to store files that will be deleted or overwritten during the synchronizing process.

Backup Folder:
C:\Users\jeff\AppData\Local\BestSync\Backups\ORC\%20121219%
(The Backup Folder can not be "Folder1", "Folder2" and their sub-folders)

☒ Copy new added files to the backup folder too.

☒ Backup to a single Zip file. ⚡

Versioning - Create sub-folder according to the started time
Date String of the starting time

Full backup the source folder for every specified days ⚡ 0
(0:No; 1~days):

Maximum preserving days of the backup files (0:No limit; 1~): ⚡ 60

OK Cancel Help

When the backup option is toggled on and off by checking / unchecking this box...

... BestSync "forgets" some of these other options. Particularly, the Backup folder is forgotten when the backup option is disabled and the user must retype the folder when the backup option is re-enabled.

Please enhance BestSync to remember all of these settings even when the backup option is disabled at the top.
