When files in one side are deleted (absent), select the action to do.
Do nothing.
Delete: Delete the remained files from the other side.
Copy: Copy absent files to the other side.
Mirror: Delete files from the target folder if they do not exist in the source folder. And overwrite the target files if they are different from the source files.
Detect moved files, move these files in the other side correspondingly.
Delete file for saving space
Do nothing.
Delete the source files.
==Moving file. (NOTE: Moved files will not be backed up!)
Delete the unchanged files in the target folder.
Delete files older than following days:
90
days (Filter options will be adjusted automatically)
Only delete the old files in the target folder.
Warning: If "Delete" or "Mirror" is selected, please setup "Backup" option also, otherwise it may cause the file lost!
